Building a Water Tank.

At a special meeting of the Town Council last Thursday evening the question of building a water reservoir for fire purposes was up for discussion.

It was proposed to locate the new water tank in the vicinity of the Armbruster mill, the dimensions of the tank to be approximately 24x12x12, and to be entirely underground, on the street allowance.

In the old power house, on Main St. north, there is located one of the best wells in the town, and the proposition is to have the tank located near this. The proposed tank will hold 18,000 gallons of water, and this in conjunction with the tank on the roof of the mill, which holds another 3000 gallons, will give an additional available supply for fire purposes of some 21,000 gallons.

The cement tank, at the Bank corner, installed some ten years ago, is limited to a 12,000 gal. capacity when full, and, as is well known, when this has been pumped out, the town's fire protection has ceased.

A Highway Traffic Case.

Pete Bremerdorf, a truck driver from Mayerthorpe, was up before the Bench on Thurs. last, charged with driving recklessly on the Highway.

It is claimed that Pete is the gent who ran into the nigh horse of John Schmigelski's team when the latter was driving to Stony on the afternoon of Tues. Aug. 23. It is claimed that the damage done the horse by the truck caused the death of the animal a few days later, and John would like to know who is going to pay for its replacement. The court action is said to be a preliminary step, to this end.

At the first hearing, which was before Mr Justice McCulla, the evidence of several witnesses was taken; and the hearing was adjourned for lack of the presence of the gent who was with John on the wagon seat at the time of the accident.

The Tait-Mitchell Fight.

The following report of the recent fistie encounter between Tait and Mitchell has been forwarded to The Sun for publication:

"After giving Harry Mitchell of Carvel a severe beating and having him out on his feet in the 5th round, Benny Tait of Edmonton had the misfortune to lose a fight to the former when the referee declared the finishing blow to be a foul. Game and tough, Mitchell made the fight interesting by absorbing a lot of punishment, but Tait was undoubtedly a sure winner had luck not deserted him. The show was held in the Gunn hall and three good preliminaries were staged in advance of the main bout. Lee Jago of Onoway was umpire.

Coalition Governments.

The question of coalition, or union, governments has been brought very forcibly to the attention of the people throughout the Western provinces of Canada within recent months. There is undoubtedly a very considerable body of public opinion which favors the reorganization of governments at the present time upon a non-partisan basis—that is, the formation of cabinets of ministers inclusive of representatives of all existing political parties, with the strongest men chosen from each to constitute the Government.

But the average elector has but a hazy idea as to how this can be brought about. Many people entertain the view that all present parties are equally responsible if such coalitions are not effected. If an official offer of coalition is made by the head of the Government in office, and it is rejected by the other party, or parties, then, of course, the latter must accept full responsibility for their decision. There is, however, only one person in each Province who can take the initial step leading to coalition. That is the Prime Minister.

Under the British system of parliamentary government the King, or his representative, invites the leader of the party having a majority in the House of Commons, or Legislature, as the case may be, to form a Government. He becomes Prime Minister. It is then his sole prerogative to select his own ministers. He may consult as many people as he chooses, but he, and he alone, names his ministers. Nobody else has any rights in the matter, except, of course, that such ministers must be approved by the people themselves by election to the Legislature. Having chosen his ministers, the Prime Minister alone can demand their resignation from the Government.

It was Premier Bennett MacDonald who proposed the formation of a National Government in Great Britain; it was Premier Sir Robert Borden who proposed Union Government in Canada during the war in 1917; it was Premier Bracken who proposed coalition in Manitoba this year; it is Premier Talmie who recently proposed coalition in British Columbia. Nobody but the Prime Minister has any right to do so. For a leader of an opposition party to propose coalition would be to infringe on the prerogatives of the Prime Minister.

Once a Prime Minister does propose coalition to the leaders of other parties then a large measure of the responsibility for the realization of such a form of administration is shifted on to their shoulders, and it becomes a joint responsibility of all to so compromise their differences as to make a union of their forces effective.

Coalitions in the past, both in Canada and elsewhere throughout the Empire, have been brought about in times of emergency in order to carry through certain policies deemed by all in the interests of the country but which it would be extremely difficult, if not impossible, for a government representative of only a section of the people—even of a majority of them,—to do by itself. Therefore, when coalitions are formed the exact nature of the emergency to be met, and the policies by which it is to be met, must of necessity be clearly stated, and it is on the basis thus set out that coalition takes place. This was true in the case of the present National Government in Great Britain, and also when Union Government was formed in Canada to win the war and enforce conscription.

Much of the opinion in favor of coalitions today is founded in the idea that party politics and party Governments are a mistake; that the whole citizenship should be united in one party and one Government; in a word, that Provincial Governments at least should be in the nature of a municipal council, or board of directors of a company. Whether such an ideal is practical is another question. There are divergent groups in many company directorates, controlling majority and a dissident minority. The same is true in municipal councils, although the members may not be definitely classified under any group name or as Government and Opposition. But the parties or groups exist just the same.

In fact when any two persons join forces to bring about any given result a party is formed, and the same is true when two persons unite to oppose any given policy or line of action. In fact, coalitions become necessary when, because of a multiplicity of parties and a dissident minority, the same is true in municipal councils, although the members may not be definitely classified under any group name or as Government and Opposition. But the parties or groups exist just the same.

Finally, a coalition government is not created through a joining of forces by a few individuals, but a union of parties. Only by a merger of parties for a given purpose can the required strength be given to a coalition. One or two individuals might enter a Government to add strength to that Government, but it would not be a coalition. Parties must unite to bring about a coalition.

Old Orders Still Used

Some of the standing orders still in force in the House of Commons are over two centuries old. An old Norman French phrase is still in use in certain instances, notably "Le Roy le veult" (the King wishes it) in giving the Royal assent to a Bill.

A "cheerful telegram" campaign to boost the sending of good as well as bad news by wire, has been started in Scotland.

Suffered A Severe Attack

Of Dysentery

Mr. P. L. D. Moulard, Vernon, B.C., writes:—"Last Summer I suffered from a severe attack of dysentery. I tried nearly everything on the market, without getting any relief, until a friend told me to use Dr. Fowler's Extract of Wild Strawberry, which I did, and I got immediate relief. Now I am making it a rule to always keep a bottle of it in my medicine chest."

"Wild Strawberry is sure relief for dysentery, colic and diarrhoea, but I always use I got the genuine 'Dr. Fowler's'."

One Well-Managed City

Louisville, Kentucky, Took Simple Way of Effecting Economies

Louisville, Kentucky, will face its new fiscal year, September 1, with a cash surplus of more than \$400,000, the majority of its employees will be on a full salary basis and another reduction in taxes is promised.

Cheques are being written for \$140,000 to pay back a 10 per cent. salary cut which went into effect on January 1. At the same time the tax rate has dropped from 23.4 mills to 22.3 and assessment values have been cut 7 per cent.

The explanation is simple. In the closing days of 1931 Mayor Harrison, of Louisville, announced a 10 per cent. salary cut for civic employees, and at the same time promised them that should they effect sufficient economies despite the reduction in the tax rate and assessment, they would be given the back pay.

The effort was instantaneous. Economies were effected in every department. The savings came from positive acts of the employees, such as curtailing gasoline supply, care in driving trucks and other vehicles, substituting of materials—in short, from thrifty vigilance.

Even the taxpayers showed an improved tone. On July 28, 89 per cent. of the taxes had been paid, leaving only \$887,400 unpaid of the total \$8,055,945 receivable as of January 1, 1932.—Winnipeg Tribune.

HAS LOST FAT FOR THREE YEARS

68 lbs. Gone Altogether

A woman writes:—"For nearly three years I have been taking Kruschen Salts every morning in hot water, and have lost 68 lbs. fat. My weight before taking them was 196 lbs., and it is now 128 lbs. Compare the difference—it is marvellous. My mother and sister are also taking Kruschen and lots of our friends, and think they are wonderful. I regard diet. It is not necessary to do a little bit of dieting; in my case I have never denied myself anything. I start taking Kruschen Salts. I walk every day, and do not eat many potatoes or much sugar. I don't think every body is grateful enough to Kruschen Salts for the great help they have been to me, and shall never stop taking them, or recommending them to people I think need them."—(Miss) K. T.

Taken every morning, Kruschen effects a perfectly natural clearance of undigested food substances and all excessive watery waste matter. Unless this waste is regularly expelled, Nature will eventually store it up out of the way in the form of ugly fat.

Wonders Have Vanished

Loch Lomond, Scotland, where Kaye Don made his world speedboat record, has lost wonders which attracted tourists. Its floating island has disappeared, and scientists have explained that its "waves without wind" are merely the result of natural swell, and that the "rich without rain" are really vapors which travel from one island to another by swimming.

Awful Asthma Attacks. Is there a member of your family who is in the power of this distressing trouble? No service you can render him will equal the bringing to his attention of Dr. J. D. Kellogg's Asthma Remedy. This remarkable remedy rates its reputation upon what it has done for others. It has a truly wonderful record, covering years and years of successful almost every part of this continent, and even beyond the seas.

Awarded Scholarship

John L. Cathie, bread-van driver, of Toronto, because of his high general proficiency standing at Meds. University of Toronto, last year, has been awarded a \$250 scholarship for 1933. Cathie was elected secretary-treasurer of his class for the next year by the freshmen prior to the holidays, during which he has been employed on a bread route in order to earn funds to put him through the sophomore class.

The Oil For The Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children, when taken with colds and croup, and for the mature who suffer from pains and aches, but there are, directions for its use in sick cattle. There should always be a bottle of it in the house.

Auto Has No Seats

Wife Of Indian King Rides Sitting On The Floor

After his visit to Europe the Emir Feisal advised his father, the King Saud, King of the Hedjaz, to buy automobiles for the entire royal family. The result was a \$150,000 order. The coachwork of the cars is polished aluminum. The one for the Emir's mother is completely closed in and has no seats. Instead its floor is spread with thick carpets. Overhead are electric fans to cool the heat of the Arabian desert.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Ray Penetrates Fog

Apparatus for projecting an invisible ray that penetrates fogs has been installed on two new German liners. The beam is said to increase by twenty times the distance through which the human eye can see and is as efficient by night as it is by day.

Quick action saves trouble, worry. Keep Douglas' Egyptian Liniment always handy. Stops bleeding instantly. Cauterizes wounds. Quickly relieves Barber's Itch and Ringworms.

Better Than A Fee

Because they refused to accept pay for their services at a cabaret entertainment given in connection with the celebration of Lord and Lady Lonsdale's golden wedding celebration, a number of London cabaret girls have just received diamond brooches from Lord Lonsdale. The men performers were given diamond stick pins.

Should Make For Contentment

The entire State of Montana, it is estimated, will have a wheat crop of 50,000,000 bushels. The Lethbridge district of Alberta, some farmers predict, will have 40,000,000 bushels. Comparisons in this instance should make us feel contented with our prospects says the Lethbridge Herald.

Persian Balm is alluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexions of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

A City Of Churches

The City of London, England, has more churches in proportion to the number of residents than any other part of the world. There are forty-seven churches to 10,000 people.

Worms in children, if they be not attended to, cause convulsions and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Sixty-five per cent. of the manufactured products used in Argentina are imported from other countries.

"Birthdays needn't make you Old!"—says Irene Rich

"A screen star never worries about birthdays," this lovely star says, "as long as she doesn't look old. To hold her public she must keep her first loveliness of youth."

"That's why in Hollywood we regard complexion beauty above all things." Of the 604 important Hollywood actresses actually 886 use Lux Toilet Soap! You, too, will find this white lather soap the perfect complexion preserver. Buy several cakes and begin to use it today. Only 10¢ a cake!

"I'm 40"

Challenge Government Statements As to Possibilities of Commercial Fishing in Hudson Bay Waters

Strong criticism of the Dominion Government report on the commercial fishing possibilities of Hudson Bay and Straits, is made in an analysis prepared by the Fish Committee of the Industrial Development Board of Manitoba, following release of the findings of the Hachey investigations of 1930.

Mr. Hachey's statement that "as a result of the total work covering the whole of Hudson Bay, not a single commercial fish was taken, hence it is quite easy to arrive at a definite conclusion that a deep water fishery of commercial importance does not exist in Hudson Bay," is challenged by the Committee with abundant evidence gathered from eminent authorities. This evidence indicates that commercial fish in substantial quantities do exist in both the Bay and the Straits.

The committee points out that, although the expedition left Halifax on July 26, returning on September 20, it actually spent only 80 hours in fishing operations:

Seven hours 15 minutes with hand lines; 12 hours 15 minutes with drift nets; 2 hours 55 minutes with long lines; 57 hours 50 minutes on trawling operations.

It further points out that, although the superficial area of Hudson Bay is 578,000 square miles, the record of sailing times supplied by Mr. Hachey shows that the expedition traversed, in the process of investigation, less than 5,000 nautical miles.

The report refers further to the fact that for seven days investigations were conducted without bait.

The committee's report gives detailed information regarding the investigation of Dr. Alexander Bakjov, who is attached to the Biological Board of Canada, at the University of Manitoba. This information proves the presence of commercial fish in Hudson Bay. Dr. Bakjov has in his possession specimens of cod caught by Mr. Hachey during his expedition. These cod are very small and young and thus might not possibly be brought within Mr. Hachey's category of "commercial fish," but the committee claims they constitute definite evidence that cod do exist in Hudson Bay and that the scientific evidence submitted by Mr. Hachey to the effect that the waters of the Bay were too cold for reproduction, is open to question.

Dr. Bakjov is an eminent authority on the fish industry and has in his possession records of other expeditions into the White Sea and Arctic Ocean, in which the latitudes traversed and the equipment used are almost exactly similar to those of Mr. Hachey's expedition. This information indicates that had the Hachey expedition continued operations into September, it is quite possible that they would have found an entirely different situation in connection with the supply of cod in Hudson Bay waters. In the month of September, the Russian expedition found gigantic schools of cod in almost exactly the latitude of Hudson Strait and under similar conditions all around, except that their expedition continued a little later in the season. Mr. Hachey, with Halifax as his base and having to return there before winter set in, could not prolong his investigations to that date, but nor could anyone working from Halifax. But an expedition working from Churchill could do so and might conceivably find cod in September.

"What is the matter?"
"Ah, Doctor, I can hardly get my arms over my head—and it is nearly the same with my legs."—Lustige Klats, Leipzig.

W. N. U. 1940

Buckboard May Have To Go

Residents of Isleboro On Penobscot Bay Want Cars

Few isolations are secure against the forward march of the automobile. Even Bermuda, in mid-ocean, has to be always on the alert to vote down the motor threat to her repose. On Isleboro, however, on Penobscot Bay, the buckboard still reigns. Ten miles from shore, Isleboro has warded off the automobile, and most of the summer residents would gladly keep the machine age at arm's length indefinitely. But the permanent residents have grown restive at being deprived of a lively and entertaining instrument of civilization. They want automobiles more than they want quiet and are likely to get them, for the issue is coming up at a special town meeting.

(By Ruth Rogers)

773

A YOUTHFUL DRESS FOR THE COLLEGE MISS, HIGH SCHOOL GIRL AND YOUTHFUL WOMEN TYPES

Still another new and lovely style with smart, sportive-air for fall school wear.

It's equally suited for office, street and general day occasions. It adapts itself to the new fall woollens, so soft and lovely in texture.

A rhum-brown diagonal woollen made the original.

Twined another in wine-red coloring, is so effective.

It's a model that also makes up attractively in rough crepe silk or wool crepe.

Style No. 773 is designed for sizes 14, 16, 18, 20 years; 36, 38 and 40 inches bust.

Size 36 requires 3 1/2 yards of 39-inch material with 1/2 yard of 35-inch contrasting.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Arranging For World's Fifth Poultry Congress

Italy Making Great Preparations For Show Next Year

Prof. Alessandro Ghigi, director-general of the 1933 World's Poultry Congress, was in Ottawa recently in connection with the fifth congress. Prof. Ghigi interviewed the Federal Minister of Agriculture concerning Canada's participation in the congress, which takes place in Rome, September, 1933. In addition to this he discussed with Canadian members of the World's Poultry Science Council details of the congress.

According to the congress director-general, Italy is making great preparations for this event. The show will take place in the ancient market of the Trojans. The "market" is a circular gallery, six stories high, with an old Roman "road" leading to each tier. From these "roads" open dozens of rooms in which the exhibits will be placed. The King of Italy is the Royal patron and will probably open the congress in person. Mussolini heartily endorses the congress and it is expected will be present some time during the exhibition to meet the delegates.

Farms In Canada

Heavy Increase In Number Of Farms In Last Ten Years

There were 17,571 more farms in Canada at the time of the 1931 census than in 1921, according to figures issued by the Dominion Bureau of Statistics. The total for 1931 was 728,664, and for 1921 it was 711,090.

There were decreases in the eastern provinces from Ontario to the sea, but increases in all the other provinces. Saskatchewan showed an increase of 17,021 in the decade. Alberta 14,454, British Columbia 4,106, and Manitoba 947. There were 41 farms in the Yukon.

Prince Edward Island had a decrease of 836; Nova Scotia, 7,988; New Brunswick, 2630; Quebec, 1,662, and Ontario, 5,879.

There was a total of 586,229 farms owned by their occupants, 74,382 tenanted and 67,942 partially owned. Full ownership of farms decreased 4 per cent. in the decade, while tenant farmers increased 33 per cent.

Empire Trade Ship

May Sail From England For Canada Next Spring

Response from manufacturers and exporters in the United Kingdom to an invitation to display their goods for the benefit of Canadian buyers at Montreal on the liner "Laurentic" has not been sufficient to justify the sailing of the vessel on October 1.

Numerous firms have indicated they are awaiting publication by the United Kingdom and Canadian Government the decisions arrived at during the Imperial Conference at Ottawa before exhibiting their goods.

As these decisions will probably not be made public before the end of October it is hoped the empire trade ship will sail for the Dominion next spring.

Should Eat More Cheese

Canadians could do much for a great industry as well as contributing to their own sustenance in the use of a cheap and nutritive diet by a greater consumption of cheese. It should be made a staple food and be found on the table at all times.

Foreman: "Hi, why aren't you getting on with yer washing?"
Workman: "Bill accidentally spanned the pall to the minute hand, but it'll be round again in half an hour."—The Hummerist, London, England.

Survey Results In Better Picture Of Weed Problem In The West And Points To Possible Remedy

Intelligence and Ability

Are One and the Same Thing, So Scientists Say

Intelligence and ability are the same thing, and both are "inborn," the British Association for the Advancement of Science was told.

The man with the highest intelligence is the man with the greatest number of inborn abilities. Prof. W. McDougall, noted psychologist, said: "The difference in intelligence between man and the lower animals is really a difference in inborn abilities."

Intelligence, he explained, is a sort of outgrowth of instinct, and both are based on two things—propensities or "natural bent," and abilities. Instinct is a close linking-up of a "natural bent" with some particular ability. This close combination of the two governs actions of lower animals.

The secret of the ability of migrating birds to find their way accurately over long distances probably lies in powerful eyesight, enabling them to note landmarks. Prof. C. G. F. Patten told the association.

He expressed doubt that birds have an instinctive "sense of direction." Young birds are guided by older birds who have been over the route before.

Facts About Tobacco

Weed Is Grown In Nearly Every Province Of The Dominion

Here are some interesting facts about tobacco growing in Canada supplied by the Department of Agriculture at Ottawa:

Tobacco growing was introduced by French settlers in the early colonial days;

Government assistance was first given in 1785;

In 1871, the year of the first decennial census, production was estimated at 399,870 pounds for Ontario and 1,195,345 pounds for Quebec;

In 1931 there were some 7,200 farms producing tobacco in Ontario and Quebec, and approximately 70,000 persons were engaged in the production or manufacture of tobacco and its products;

Tobacco is grown in nearly every province in the Dominion;

Canada's production of commercial tobacco for 1931 was estimated at 51,000,000 pounds.

Support Is Promised

Canadian Provinces All Interested In Success Of Grain Show

All Canadian provinces are enthusiastically supporting the World's Grain Exhibition and Conference, according to reports from those who attended the recent gathering of Federal and Provincial representatives called together at Toronto by Hon. Robert Weir, Federal Minister of Agriculture.

During the meeting, Hon. W. C. Buckle, Minister of Agriculture and chairman of the exhibition and executive, conferred with representatives of the provinces and technical men of the Federal Department of Agriculture upon matters in connection with the show at Regina next year.

In response to requests from numerous organizations in western Canada a conference on the destruction of weeds by means of chemicals was called in Edmonton in the fall of 1929. This conference, asked the National Research Council to undertake a programme of research with reference to the destruction of weeds and recommended strongly that the program should not be limited to the use of chemical weed eradicators. The Council appointed an Associate Committee on Weed Control, with representatives of the chief institutions concerned in the general problem, and the committee undertook the task of developing a programme co-ordinating as far as possible all activities in the entire field of weed control investigations in the prairie provinces.

One of the committee's first actions was to initiate a weed survey. A special investigator was appointed to study and compile the results of surveys by the provincial departments of agriculture in the prairie provinces and to make a personal reconnaissance of this area. This work he carried on for two years, then prepared a report which is now in press, and which, with its accompanying maps showing the distribution and prevalence of the worst weeds, gives a better picture than we have had hitherto of the weed problem in the West and the kind of action required to meet it.

The provincial departments of agriculture undertook a programme of field experiments with chemicals, under a system carefully planned in conference. Grants were made out of funds placed at the disposal of the Committee by the National Research Council, to assist various university workers in the investigation of some of the more fundamental aspects of the problem, such as the growth habits and root systems of weeds, the diseases of weeds (which may spread to crop plants), and the effects on the soil of chemicals applied for weed control. At the last meeting of the committee, representatives of the Federal and Provincial Departments of Agriculture, and of the universities, recommended unanimously that a popular bulletin should be issued, discussing weed control in the light of these newer investigations. This bulletin is now in press.

The Division of Biology and Agriculture of the National Research Laboratories undertook an extensive programme of research on the use of chemicals to weed bullocks. This included the testing of a wide variety of chemicals with a view to finding useful ones, and the investigation of their effects on plants as modified by a large number of factors in the plant, in the environment, and in the mode of employing the chemicals. The first part of this work was done in greenhouses at the University of Alberta, and had progressed far enough to justify laying out field experiments this season for the further testing of twelve of the most promising chemicals. A careful study has also been made of the fire hazards involved in the use of chemicals, a common ingredient of commercial weed killers, and similar substances. A paper is now in press showing clearly the conditions under which it is safe and those under which it is dangerous to use such materials.

These studies, in some of their more fundamental aspects, will be continued to still better advantage in the new laboratories at Ottawa, where there will be facilities for controlling growth conditions, thus making it possible to observe accurately the effect of any chemical treatment applied to the weeds.

Scotland Wants Quiet Sunday

Scotland's annual campaign for quiet Sunday observance is being waged more vigorously this year than ever. Church meetings are being held in large cities, and prominent churchmen are denouncing Sunday trading, Sunday excursions and Sunday movies.

Compulsory insurance for autobus passengers has been decreed in Jugoslavia.

WORLD HAPPENINGS
BRIEFLY TOLD

A suitable home for the Canadian legation in Tokyo may be expected in the very near future.

Jimmy Oates, first man to cross Canada by motorcycle, now plans to motorcycle from Ottawa to Churchill.

Switzerland sent 2,200,000 pounds of silk and rayon products to Great Britain last year.

Thirty more Doukhobor men have been sent to Piers Island. There are now about 100 men on the island. Three Chinese boys have left Calgary for their homeland to join the Nationalist army air force. They were trained locally.

The report to the League of Nations on Manchuria advises establishment of Chinese autonomy under Japanese advisers.

The British Government has received no intimation from the United States regarding postponement of the world economic conference, expected to begin in London in October.

Lord Wakefield, owner of "Miss England III," fastest speed boat in the world, announced he would take no further part in motor boat speed contests.

Population contained within the area designated as Greater Vancouver, according to the census of 1931, is placed at 308,340, it is reported by the Dominion Bureau of Statistics.

Plan World Cruise

Cunard Cruiser "Carinthia" To Make Cruise Of Southern Hemisphere

The Southern Hemisphere will be explored for the first time by a cruise liner when the Cunard cruiser "Carinthia" makes her world cruise next January, leaving New York on January 7th. The entire cruise will be made under the Southern Cross. The duration of the cruise will be 139 days with a distance of approximately 56,301 miles, calling at 35 ports.

After leaving New York the "Carinthia" will call at Kingston, Jamaica, then through the Panama Canal to California, Hawaii, down to the South Sea Islands, visiting in rapid succession those islands of fabulous beauty and fascination, Tahiti, Harongoma, Samoa and the Fijis, continuing to New Zealand and Australia, New Guinea, the Dutch East Indies, including Bali and Java, the Strait Settlements, Ceylon, makes a stop for the first time in the history of any cruise at the famous Seychelles Islands, (Port Victoria), down the coast of sunny East Africa from Bombay to Cape Town, across the South Atlantic to Montevideo (or Buenos Aires), Santos, Rio de Janeiro, and back to New York. Practically all of the itinerary have seldom been visited by Canadians or Americans.

The cruise will be particularly interesting to Canadians in that a large number of British possessions will be visited, including America, New Zealand, Australia, the Strait Settlements, Ceylon, Seychelles, Kenya, Zanzibar, Union of South Africa and Barbadoes.

The ship is due back in New York on the afternoon of Thursday, May 26th. The "Carinthia" is the newest steamer in the Cunard fleet, was especially constructed for cruising and is of 20,000 tons gross. The shore arrangements of the cruise are being managed by Thos. Cook & Son.

Secrets Of The Skies

Monster Astronomical Observatory To Be Built In States

Pooling resources, the University of Chicago and the University of Texas are planning a co-operative new astronomical observatory—surpassed only in size by the Mount Wilson Observatory—to search out the secrets of the skies.

Announcement of the project was made by Vice-President Frederic Woodward, of the University of Chicago. The observatory, he said, would house an 80-inch reflecting telescope. It is expected the observatory will be completed by July 1, 1938, at a cost of about \$375,000.

Pelicans in flight move their wings in unison, taking their beat from the leader and keeping time with him.

Sweeter, More Fragrant
in Your Pipel

Any pipe tastes better, from the time you first load the bowl with Ogden's cut plug — it's sweeter, richer, cooler and more fragrant.

SUNDAY SCHOOL LESSON

SEPTEMBER 25

MOSES HONORED IN HIS DEATH

Golden Text: "Precious in the sight of Jehovah is the death of His saints."—Psalm 116: 15.

Lesson: Deuteronomy 32:48-52; 34: 2-8.

Devotional Reading: Psalm 116:12-19.

Explanations and Comments

Moses Learns Of His Approaching Death. 32:48-52.—Moses' work was over. In the plains of Moab he was in sight of the goal of his forty years' pilgrimage. He could behold the Land of Promise, for he was over against Jericho, but he was not to enter it; his last hour had come.

Death is part of the divine economy. The thought of death should make this life seem worth while, and the other world real. Life is a beautiful gift from our father's hands, meant for us to enjoy, but above all, to use aright. And death is another gift from our Father which will lead us into an infinitely larger, happier life. Dr. Henry van Dyke's beautiful prayer breathes the true spirit: "Steady me to do my full stint of work as well as I can; and when that is done, stop me, pay me what wages Thou wilt, and help me to say, from a quiet heart, a grateful Amen."

The Death Of Moses. 34:5-8.—To Joshua, his minister, Moses turned over the reins of his authority. He climbed to the summit of the ridge overlooking the Plain of Moab, below him lay the white tents of the people whom he loved, for whom he had labored. To the West lay the goal which he had ever had in view; it attained had been the sustaining hope throughout all the wilderness life. Long and earnestly he gazed. "And then he quietly turned away to make his journey to a fairer land of promise than that upon which his eyes had been fixed. No finer close to a great life could be imagined. Any description of the pageantry of a royal funeral would be tawdry in comparison with the dignity and

grandeur of those closing scenes. To leave the grand old warrior alone with God on that mysterious summit overlooking the land which in after years would in every event of its glorious spiritual history witness to his servant—the imagination could not dream of an end more august and splendid."

New Anti-Aircraft Gun

Claimed To Have Range Of Seven and Half Miles

That a new anti-aircraft gun can bring down an attacking bomber seven and one-half miles up in the air, is the claim to those conducting tests on the Riviera coast near La Seyne, France. The secret of the gun's construction is jealously guarded by the firm whose engineers planned it. Anti-aircraft guns have previously proved effective at a height of about three and one-half miles, but modern aircraft can attain much greater altitudes. In the experiments off La Seyne an aeroplane with pilot and mechanic, ascended seven and one-half miles towing, suspended 1,000 feet beneath it, a target on which the anti-aircraft gun opened fire with live shells. Aviation, military and naval men of Europe are watching the tests.

Record For Survey Ship

Government Vessel Sets Mark For Far North Sailing

Completing what is said to have been a new record in far north sailing, the SS. Ocean Eagle, government survey ship, in command of Captain William Fooker, returned to Churchill after a 17-day voyage into the Foxe Basin regions. The "Eagle" steamed near the southern extremity of Cookburn Land, east and slightly south of the magnetic pole. It is stated that no steamer of the proportions of the "Eagle" had sailed so far north in that area east of Baffin Island.

Ontario Is Interested

Province Expects To Be Well Represented At World's Grain Show

Ontario will be adequately represented at the World's Grain Show in Regina, July 24 to August 5, 1933, Hon. T. A. Kennedy, provincial minister of agriculture, said at a meeting of the show's Ontario committee at Toronto recently.

The minister advised the committee Ontario should be represented in the intercollegiate and junior grain judging competition. Plans are being completed for holding grain judging competitions at several strategic points throughout the province to select representatives for a final competition at Guelph. Three three Ontario representatives will be chosen.

Consideration was given the preparation of an educational exhibit at the show, representing the natural resources of the province.

No more
dusting
for me!

at least not with old-fashioned dust cloths. I've found a better way.

Thousands of Canadian women know that her "better way" is the Appleford Wonder Paper. Made from clean rags and soft paper pulp scientifically treated with high-grade furniture polish, it dusts—as it cleans—as it polishes.

Wonder Paper is changing the old-established order of house-cleaning. One neat package of it appeals more to women than yards of old rags that spread dust and constantly need washing to be sanitary.

You get twenty-five sheets of Wonder Paper for a quarter. Simply crumple a sheet into a soft wad, go over the furniture, woodwork and the floors. The results are with a delight. In half the time and with half the effort, you get a necessary task done far more satisfactorily. And when you're through, throw away the piece of Wonder Paper. No shaking out, or washing of dusters. Certainly you ought to try Wonder Paper.

Special Offer

WONDER PAPER is made by the makers of the famous PARASANI, the Heavy Waxed Paper in the Green Box. Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If yours hasn't, just send this coupon and we'll give you a booklet entitled "Lettovers", containing one hundred recipes, as a bonus.

Appleford Paper Products, Ltd., Hamilton, Ontario. Enclosed find 25c for which please send me one package of The Wonder Paper and your 100 recipes for "Lettovers".

Madame Lacrole's delicious
CHOCOLATE LAYER CAKE

4 cup butter
1 cup sugar
2 eggs
1 teaspoon vanilla extract
1 cup milk
2½ cups pastry flour (or 2 cups and 3 tablespoons of bread flour)
3 teaspoons Magic Baking Powder
¼ teaspoon salt

Cream butter; add sugar, a little at a time, beating until light; add beaten yolks and flavoring; add flour, sifted with salt and baking powder, alternately with milk. Fold in stiffly beaten egg whites. Bake in 3 greased layer cake pans in moderate oven at 375° F. about 20 minutes. Recipe for Chocolate Icing and Filling is in the Magic Cook Book.

Why Magic
Baking Powder is used
exclusively at this
Montreal School
of Domestic
Science

"We teach our students only the surest methods," says Madame R. Lacrole, Assistant Director of the Provincial School of Domestic Science, Montreal. "That's why I always use and recommend Magic Baking Powder. Its high leavening quality is always uniform. You get the same satisfactory results every time you use it."

And Magic Baking Powder is the unquestioned choice in the majority of cooking schools throughout the Dominion. Cookery teachers—and housewives, too—prefer Magic because of its consistently better results.

Free Cook Book—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ontario.

Made in Canada

The Graf Zeppelin, German dirigible, recently arrived at Friedrichshafen, Germany, completing its fourth round trip of the year at Pernambuco, Brazil.

Acidity Overcome

Wonderful Results From Famous Vegetable Pills

Instead of having an acid stomach and being constipated, Mr. Frank C. is well. "I can eat anything since trying Carter's Little Liver Pills," he says. Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels. Dr. Carter's Little Liver Pills are without equal for correcting Constipation, Bloating, Headaches, Poor Complexion and Indigestion. 25c. & 75c. red paper, everywhere. Ask for Carter's by N.A.M.E.

THAT all the "Battles of the Century" are not fought in the squared circle? Here is one between two elk in the shadow of Pyramid Mountain in Jasper National Park, Alberta, Canada, before an uninterested audience.

OTTAWA SESSION LIKELY TO MAKE NEW HISTORY

Ottawa, Ont.—Canada's parliament convening on October 6 will make new history.

Signs portend a four weeks' sitting of parliament in the fall devoted almost entirely to intra-empire trade. Perhaps even three weeks may suffice. To some extent opposition members will be a determining factor. And from that quarter there has been no official expression of views on the results of the Imperial Conference.

But in any event, approval of the trade pacts will probably take place in time for adjournment on or before November 15. A recess until January 15 is expected.

The legislative programme when parliament reassembles in January will probably comprise:

(1) Legislation on the report of the transportation commission, headed by Mr. Justice Lyman P. Duff, of the supreme court of Canada.

(2) Approval of the Canada-United States St. Lawrence seaway treaty providing ratification has been already given by the United States senate.

(3) Amendments to the Finance Act.

(4) Introduction of redistribution bill.

From present indications, the budget will probably be brought down late in February. Like the financial statement, the main estimates will not be tabled until early next year. Preliminary work on the estimates will likely be under way shortly.

A bill for redistribution of Dominion constituencies always follows the completion of Canada's census every ten years. From the viewpoint of suggesting an election the measure consequently has no significance whatsoever.

Usually contentions amendments to the redistribution act go through a committee before being submitted to the Commons for enactment. This course will be followed during the coming session, it is stated.

The Finance Act in all its ratifications will likely be reviewed by a special committee. Amendments to the act are promised for early next year.

Slayer Pays Penalty

Russian Who Shot French President Dies On Guillotine

Paris, France.—Paul Gorgoulloff, half-mad Russian adventurer, died on the guillotine at Saint prison for the assassination of President Paul Doumer of France. The knife of the guillotine fell at dawn 6:03 a.m.

The Russian fanatic's last hope of escaping the razor-edged knife of "The Widow" passed when President Albert Lebrun, who succeeded Doumer, rejected his appeal for a commutation.

Dr. Gorgoulloff was not told of the president's decision until a half hour before his execution, in accordance with French law and custom. Then he was awakened by his guard and lawyers, informed of the appeal's failure, and led unceremoniously to the guillotine.

Remembrance Day

War Veterans Favor Stricter Observance Of Anniversary

Vancouver, B.C.—Believing that the importance of "Remembrance Day"—November 11—is not fully realized by the Canadian people, the eleventh annual convention of Amputees' Association of the Great War passed a strongly worded resolution favoring stricter observance of the anniversary.

"We pledge ourselves to do all in our power to see that this day shall be sacred in our national life," the resolution declares. "We further appeal to the industrial and commercial life of Canada to follow the splendid example set by dominion, provincial, and municipal governments in closing down all but necessary works on 'Remembrance Day'."

W. N. U. 1960

Says Empire Threatened

British Ideals Of International Trade Are In Danger

Toronto, Ont.—Suggestion that the very civilization Great Britain had created might destroy her in the end was made here by Dr. T. E. Gregory, of London, one of the world's leading economists, in an address. Cabinet ministers, professors, bankers and outstanding business men were in his audience.

Dr. Gregory questioned whether the British ideals of international trade and congresses would win out, or whether the American ideal of less interest in international trade and more in mechanization of production would prevail in the next two decades.

"Do we want civilization of the kind my country has created, and which may destroy my country in the end, or the kind America has created, and may carry to a very triumphant conclusion?" Dr. Gregory questioned.

There was going on in the world a revolution in raw material that could not be checked, said Dr. Gregory. The raw material producing areas were going to resort to manufacturing in order to keep those busy who were being driven from the land.

Aviators Burned Alive

Pilot and Pupil Meet Horrible Death At Montreal

Montreal, Que.—Two men were burned alive in an aeroplane here as the machine went out of control and crashed to the ground. They were Captain Blaise A. Lebeuf, chief instructor of the Montreal-Light Aeroplane Club, and C. W. Chambers, also of Montreal, a student pilot.

Lebeuf had taken Chambers up for one of his final lessons in "figure" and "dives." The machine was seen to falter when about 1,000 feet up. There was a roar when flames suddenly appeared about the engine and swept back over the occupants.

The plane then dove into a farmer's field near St. Hubert airport. There was an explosion as the machine struck the earth. So intense was the heat, no efforts at rescue could be made.

Captain Lebeuf was one of the most proficient flying instructors in Canada. He learned to fly in Windsor, Ont., and later joined the Royal Canadian Air Force. At Camp Borden he was regarded as one of the three outstanding instructors there.

A coroner's jury investigating the mishap returned a verdict of accidental death on both victims.

No Fall Session

No Early Sitting Of Alberta Legislation Expected

Edmonton, Alberta.—A fall session of the Alberta legislature is not likely, it is stated by Premier Brownlee, and the action of the Dominion Government in calling parliament in October 6 will not have any effect upon the situation in this province so far as its own house is concerned.

Unless some unexpected emergency arises, it will not be necessary to call a sitting of the legislature before Christmas, said Premier Brownlee. If economic or other conditions should become sufficiently serious, it might be found desirable, but there does not appear at present, the premier said, any reason for such action this fall.

Mr. Brownlee intimated however, that in any case as early a date as possible after the new year will be arranged for the regular session.

British Motorists Pay More For Gasoline

Price Has Been Increased Nearly Twenty Per Cent

London, England.—British motorists were hit by an increase of nearly 20 per cent. in gasoline prices, raising the standard grade to 39 cents a gallon.

The London Omnibus Company estimated the rise would increase its expenses more than \$1,000,000 a year. News of the increase caused a sharp rise in oil shares.

The growing army of stall car owners had hoped the oil war which has given them cheaper gasoline would continue indefinitely but the inclusion of Roumania and Russia in an agreement ended the price cutting.

COMMENCES BIG WORK

James Purves, heraldic artist of London, Ontario, who has been given the task of inscribing some 68,000 names in the Book of Remembrance, which will be placed within the casket of the Altar in the Memorial Chamber at Ottawa. The names will be written by hand on fine calfskin vellum.

Freight For Bay Route

Will Shortly Discontinue Solicitation Of Freight For 1933 Season

Ottawa, Ont.—While the government takes no part in the operation of the Hudson Bay Railway and the Port of Churchill, the information that the Canadian National Railways will shortly discontinue the freight solicitation service for the new route is unofficially confirmed here.

The railway has been pushing the Hudson Bay route strongly in the past few months, but this effort will be stopped shortly prior to the closing of the Hudson Bay navigation season. The chief motive in discontinuing the service is to economize, but it is pointed that there is little purpose in soliciting freight for 1933 at this time.

Pay Roll Robbers

New Type Of Tear Gas Gun Is Demonstrated

Chicago.—Pay roll robbers are going to shed a lot of tears.

A new type of tear gas gun, so small it can be concealed in a coat sleeve and reputedly of sufficient power to route a whole gang of pay roll robbers was demonstrated at the Northwestern University Crime Detection Laboratory here. It is fastened to the wrist like a strap watch.

A fine wire leads from the trigger to a ring in the middle finger. All one needs to do is lift up the arm and flick the finger and the trick is done.

COMPLETION OF CANADA'S WAR MEMORIAL

Canada's War Memorial, which will in due course be erected on Parliament Hill, Ottawa, has now been completed at Farnborough, Kent, England, and for a short period will stand in Hyde Park, London, England. This picture shows the late March Brothers and sister standing before the three gigantic figures which form part of the memorial. The memorial consists of a huge arch through which pass representatives of the services who responded to the call for men during the World War.

United States Farmers Buy Manitoba Land

More Than Two Hundred Families Coming To Canada

Winnipeg, Man.—Over long distance telephone from Des Moines, Iowa, Senator L. E. Francis confirmed his association with W. J. Whidden, Winnipeg, in the purchase of 10,000 acres of farmland in Manitoba for United States farmers.

Mr. Whidden, who telephoned Senator Francis when shown a despatch from Des Moines quoting Mr. Francis as saying "nothing to it," showed the Canadian Press reporter the title to the property and his contract with the United States senator.

With other parties Mr. Whidden is negotiating for 25,000 more acres in Manitoba. More than 200 United States farmer families will settle on the total acreage, he said. These farmers are coming to Canada, he said, because of higher prices received for farm products in Canada and the fertility of Manitoba soil.

Dairy Barn Destroyed

Heavy Loss Sustained By Farmer Near Moose Jaw

Moose Jaw, Sask.—The huge barn of Fred H. Jones, prominent dairy farmer living two miles north of the city, was completely demolished by fire, including a loss estimated at \$23,000. Starting either from spontaneous combustion or from a short circuit in the electric wiring of the barn, the fire blazed uncontrolled for three hours.

The barn, measuring 270 feet by 86 feet, was valued at close to \$20,000, the feed which was stored inside was valued at \$2,000, milking machine equipment was valued at \$1,000, and 12 sets of harness were valued at about \$500. All these were a total loss.

Support Is Withdrawn

Kaye Don Loses Sponsor In Speed Boat Racing

New York.—Kaye Don, British speedboat driver and holder of the world record with Lord Wakefield's "Miss England III," said he knew of no one in England who might take his former backer's place as sponsor of speed boat racing.

Lord Wakefield withdrew his support of Don and said he planned to withdraw entirely from further speedboat ventures.

Lord Wakefield is said to have spent at least £1,000,000 in the last few years promoting automobile, speedboat and airplane speed ventures.

FREE STATE STILL CONCERNED OVER LAND ANNUITIES

Dublin, Irish Free State.—Both governments continue to maintain the strictest silence concerning the terms of the latest note from the Free State to the United Kingdom in the dispute over the land annuities, but it was reported that President Eamon de Valera had declared that in event of failure to reach an agreement on the method of arbitration, he would use the monies so far withheld for the relief of sufferers from the economic warfare.

The Free State so far has withheld payments of about \$10,000,000 on account of failure to reach agreement on the form of arbitration of the dispute—the Free State holding out for an international tribunal and the British government for an Imperial arbitral board.

President de Valera is expected to visit London for a day or so, and have a final interview with J. H. Thomas, Secretary for Dominion Affairs, before leaving for Geneva to attend the sessions of the league assembly.

Farmers Hold Wheat

Alberta Farmers Show Tendency To Wait For Higher Prices

Calgary, Alberta.—Alberta farmers are showing a tendency to hold their wheat until higher prices appear, according to grain trade heads in Calgary. Farmers are being given an average price of 32 cents per bushel No. 1 Northern.

Alberta wheat pool officials state farmers feel grain should be held at all places where facilities are available. Storage places, however, are lacking in some centres and it is feared congestion may result in many districts.

Some farmers are urging that coarse grains also be retained until prices improve. They point out that present prices made delivery hardly worth while as No. 2 C.W. oats brought only 13 cents per bushel, No. 3 C.W. barley 12 cents, and No. 2 C.W. rye 13½ cents.

Pool heads strongly denied farmers in some districts were forming organizations for the purpose of holding all their crops.

Sees Better Times

Speaker At Chamber Of Commerce Gathering Looks For Improvement

Halifax, N.S.—Declaring Canada is "on the threshold of the upswing," President W. L. McGregor, of Windsor, Ont., gave a keynote of optimism in the recent address to the assembly of the Canadian Chamber of Commerce.

"I am glad to be able to state that it is not only my opinion, but the opinion of many leaders that we are on the threshold of the upswing," he said.

But Colonel McGregor wished to make it clear he was not suggesting the advent of recovery.

"How could anybody seriously forward the idea of the advent of recovery with 14,000,000 unemployed on this continent alone?" he asked.

He was wary of the spectacular rise in stock prices.

Gandhi's Threat

Effort Being Made To Prevent Mahatma From Starting Hunger Strike

Simla, India.—Powerful efforts are being organized to deter Mahatma Gandhi from carrying out his threat to start a hunger strike.

The viceroy talked for an hour with Rao Bahadur, representative of the untouchable section of the assembly, who appealed to all classes to strive to save the life of "the greatest Indian of our time."

The Pandit Malaviya, Hindu leader, was summoned to a conference at Delhi in the hope of reaching an early agreement regarding representation of the untouchables in the issue which influenced Gandhi to threaten his campaign of starvation.

Alberta Farmers Up-to-Date in Their Homes.

Just how well equipped are the farmers of this province with respect to such modern conveniences as autos, radios, telephones, electric light or gas equipment, etc.?

The answer to this question will be found in the bulletin issued by the Federal bureau of statistics based on the 1931 census, and has been summarized by the Publicity Dept. of the Provincial government.

Autos: Alberta stands 4th among the provinces, with 1 for every 227 farms, which is he average for all of Canada.

Radios: One for every 5.63 farms.
Phones: One for every 5.86 farms.

Gas or electric light: 1 farm in every 41.3.

Water piped into kitchen: 1 in 46.6 farms.

In Alberta 64 p.c. of the farms are now located on improved earth, gravel or hard surface roads.

There were 23,967 tractors on Alberta farms in 1931.

Alberta had close to 15,000 threshing rigs and combines on its farms in 1931—one for every 4 farms.

Tire and Tube Prices Are Up.

Reports received from New York state that leading tire manufacturers were advancing tire prices of tires 11 to 14 p.c., and tube prices 15 p.c.

The foregoing indicates that right now would be a good time to purchase that new set of tires that you probably thought you'd let go until the spring. Tire prices right now and all summer have been exceptionally low and your purchase should be made at once, as no doubt the rise in price will also affect prices of tires in Canada. When buying tires readers are asked to remember the advertisements of leading Tire manufacturers, such as Gutta Percha, Good-year, etc. which have been appearing and still are appearing in The Sun's columns. Be sure and patronise the local dealers of these first-class articles. The prices of recognised standard tires as advertised by local dealers are practical ly the same all over the Dominion, and they are of the world's leading manufacturers. Buy your tires and tubes at home.

The Gov't Needs the Money.

A despatch from Ottawa states that about half a million owners of radio receiving sets have paid this year's two dollar license fee. The estimate is made that about as many more owners of receiving sets have not as yet paid their fee. A house-to-house canvass by radio inspectors is now threatened. In this year of grace, Ottawa needs the money and is going out after it.

Mebbe He Meant to Start a Drug Store.

The police arrested a man in Calgary and were bewildered at the variety of articles found in his possession, including stolen plumbing tools, musical instruments, automobile parts, 2 cameras, a box of chocolates, a scribbler, some lead pencils, pen nibs, ice cream cones, some magazines, quantity of spoons, knives and forks, corkscrew and "bottle."

Holding Out for a Fair Price.

Alberta farmers, dissatisfied with the present low price of wheat, are said to be holding their product off the market, according to an announcement made by officials of the Wheat Pool. It was declared by the Pool this move was not in the nature of a strike, but was started by farmers in an effort to obtain what they consider a fair price for their wheat.

It was not stated at what figure the farmers would start marketing all their wheat, but they do refuse to part with their product until they get a price that covers cost of production and assures a fair profit.

Alberta's wheat crop, this year, is figured at 160,000,000 bu.; and there is said to be a general movement over the whole province to use all possible storage space for holding wheat until there's a rise in the price.

Alberta's Good Crop.

Alberta's wheat yield from the crop now being harvested will average 20 bu. to the acre, an estimate made by the Dept. of Agriculture proves. The area sown to wheat totals 8,200,000 acres. At an average of 20 bu. to the acre, this would be a total yield of 164,000,000 bu.

Large percentages of No. 1 Northern are reported from the southern part of the province; and the indications are that the bulk of the wheat throughout the province will fall within the higher grades.

Open Seasons for Game.

Ducks and Geese—Sept 15 to Nov 14th.
Hungarian Partridge—Oct 1 to Nov. 30.
Sharp-tailed Grouse—Oct. 1-30.

Beating them all on the "Get-Away"

is a habit Chevrolet drivers soon acquire

IT'S one of the biggest thrills of modern motoring to get behind the wheel of the new Chevrolet and actually know the advantages of a 60-horsepower, six-cylinder motor, silent Syncro-Mesh shifting, free-wheeling and down-draft carburetion.

Acceleration! When the light flashes green step on the gas—then glide swiftly away ahead of the traffic! The new Chevrolet gives you matchless "pick-up"—lithe power that responds to every need. Keep your foot down; watch the speedometer spin up to forty—or forty-five—or more! Then slip the lever into high without even a click. That's Syncro-Mesh for you. And you can shift back to second just as easily. If you're "in" free-wheeling you needn't touch the clutch! Once you try the new Chevrolet Six, you'll never be satisfied to drive anything less!

Ask about the G.M.A.C., General Motors' own deferred payment plan. The broad inclusive General Motors Owner Service Policy assures lasting satisfaction.

Quick RELIEF from pain

A lot of things can cause a headache or other pain, but there is one thing that will always give you relief! Just take a tablet or two of Aspirin. Your suffering ceases. Relief comes instantly, regardless of what may have been making your head throb with pain.

Aspirin is harmless—cannot depress the heart. So there's no use waiting for a headache to "wear off." It is useless to endure pain of any kind when you can get Aspirin. It is a blessing to women who suffer regular systemic pain: to men who must work on, in spite of eye-strain, fatigue or neuralgia.

Learn its quick relief for colds; for neuritis, rheumatism, lumbago. Be sure to get Aspirin—and not a substitute. All druggists sell Aspirin tablets. "Aspirin" is a trade-mark registered in Canada.

THE HOUSE OF DREAMS-COME-TRUE

BY MARGARET FIDELL
Author of "The Splendid Polly," "The Hermit of Far West,"
Hodder & Stoughton, Ltd., London.

CHAPTER XXXI.—Continued

Tortured beyond bearing, this final tort, levelled at the woman he held more dear than anything in life, snatched his last thread of self-control.

He flung himself forward and his hands were gripping, gripping at the soft ivory throat from which the faint had sprung. He felt the woman writhe, struggling to pull his hands from her neck. But it meant nothing to him. He did not think of her any longer as a woman. She was something vile—leprous to the very core of her being—a thing to be destroyed. The thing which he had made not of all Jean's promised happiness a black and bitter mockery.

The mad Tormarin rage surged through his veins like a consuming fire. He would break—break her and utterly destroy her just as one destroyed a deadly snake.

And then across the thunderous roar that beat in his ears came the beloved voice, the voice that would have power to call him out of the depths of hell itself—Jean's voice.

"Blaise! Blaise! What are you doing? . . . Stop."

CHAPTER XXXII. The Dividing Sword

Slowly, reluctantly, Tormarin's hands loosened their clasp of Madame de Varigny's throat, and with a swift, flexible twist of the body she slipped aside and stood a few paces from him.

BABY'S COLDS

Never "dose" except on doctor's advice

BEST FOR ADULTS TOO

W. H. U. 1960

Jean looked from one to the other with horrified eyes.

"Madame de Varigny?—Blaise?" she stammered. "What is it? . . . Why, you—you might have killed her, Blaise!"

He stared at her blankly. His release of the Italian woman had been in mere blind response to Jean's first imperative appeal that he should desist. But the mists of ungovernable anger had hardly yet cleared from his brain; the blood still drummed in his ears like the roar of the sea.

"Blaise"—Jean spoke imploringly. "What were you doing? Tell me!"

With an effort he seemed to recover himself.

"It's a pity you didn't let me finish it, Jean," he said harshly. "Such women are better dead."

Madame de Varigny was fingering her neck delicately where the pressure of Blaise's grip had scored red marks on the cream-white flesh. She seemed quite composed. Her smile still held its quiet triumph and her long dark eyes gleamed with the same mockery that had brought her within measurable distance of quick death.

"As Monsieur Tor-ma-rin seems to find a difficulty in explaining—permit me," she said at last. "He was angry with me because I bring him the proof news that his wife is still alive, that he need mourn no longer."

While she spoke her eyes, resting on Blaise's mask-like face, held an expression of malicious satisfaction.

"His wife . . . alive?" repeated Jean dazedly. "Blaise, is she mad? Nests has been dead years—years." Then, as he made no answer, she continued rapidly, a faint note of fear vibrating in her voice: "Isn't it so? Blaise—speak! Quickly, tell her—Nests has been dead some years!"

"He cannot tell me anything about her which I do not know already, Mees Peterson, seeing that she is my sister and has been living with me ever since her husband's cruelty drove her from his home."

"Is it true, Blaise?" whispered Jean.

Belief that some substance of horrible truth lay behind the Italian's coolly uttered statements was beginning to lay hold of her.

"Blaise, Blaise"—her voice rising a little—"say it isn't true—tell her it isn't true."

He looked at her speechlessly, but the measureless pain in his eyes answered her more fully, more convincingly than any words.

"You see?" broke in Madame de Varigny triumphantly. "He cannot deny it! It was I who told him of her death and I who now tell him that she still lives. Listen to me, mademoiselle, and I will recount you how."

"No!" interrupted Jean proudly. "Whatever there may be for me to hear, I will hear it from Blaise—not from you."

She turned again to Tormarin. "Tell me everything, Blaise," she said simply.

He took her outstretched hands and drew her slowly towards him. No one, reading now the calm address, the stern imprint of endurance on his face, could have imagined it was that of the same man who, a few moments earlier, had been swept by such a tempest of uncontrollable anger.

"Jean," he said very gently and pitifully. "I'm afraid that what Madame de Varigny says may be true. I have no proof that it is not."

"Nor have you any proof that it is," broke in Jean swiftly. She swung round on Madame de Varigny. "Where is your proof—where is your proof?"

The Italian smiled. "Monsieur Tor-ma-rin will find his wife in my car. I bade the chauffeur wait with it at the lodge gate."

"Do you mean you have brought Nests—here?" cried Blaise.

"Why not?" replied Madame de Varigny, with a return to the same exasperating complacency with which she had originally described her whole scheme of revenge. "And—here? Surely her husband's house is the proper place to which to bring his wife?"

"She cannot remain here," said Blaise with decision.

"No? For the moment that was not my idea. I brought her with me because I thought there could be no more convincing proof."

Blaise looked at her searchingly. He fancied he detected a false note in her voluble speech, and a new idea,

Stop and Think!
it pays to
"ROLL YOUR OWN" with

It pays in pleasure—and pays in actual cash. For Turret Fine Cut is fragrant, mellow Virginia tobacco, that rolls into thoroughly satisfying cigarettes. You can roll at least 50 cigarettes with a 20c package.

FREE Chantecler cigarette papers with every package.

TURRET FINE CUT

15c and 20c packages—also in 1/2 lb. vacuum tins

presented itself to him. Was the woman simply putting up a gigantic bluff? Or was it really Nests, his wife, waiting in the car at the lodge gates? It occurred to him as perfectly feasible that it might be merely some woman, whose remarkable resemblance to the dead girl had suggested to the Countess's fertile brain the scheme that she should impersonate her.

His mind seized eagerly upon the idea, bolstering it up with Madame de Varigny's own admission. "I made little changes in her appearance," she had said. "The colour of her hair, the way of dressing it." Probably she was relying on those "little changes," and on the blurred recollection resulting from the length of time which had elapsed since Nests's death, to aid her in her plan of introducing as his wife a woman who closely resembled her. He felt morally sure of it, and the light of hope suddenly shone bravely.

"I believe you are deceiving me," said quietly. "Lying—as you have lied all through the piece. I'll come and see this 'wife' you have waiting in the car for me"—grimly. He turned to Jean. "Keep up your courage, sweetheart," he said in a low voice full of infinite solicitude. "I believe the whole thing is a put-up job to separate us."

Jean smiled at him radiantly. She felt all at once very confident. In a few minutes this nightmarish story of a Nests still alive and claiming her rights as Blaise's wife would be proved a lie.

Tormarin crossed the room and opened the door.

"Now, Madame de Varigny—will you come with me?"

The woman hesitated a moment.

"Come," insisted Blaise firmly. "Or

—are you afraid, after all, to bring me face to face with my wife?"

She shook her head.

"No," she said. "I am not afraid. It is only that I am so sorry—so sorry for the little Jean."

Her eyes, soft and dark and liquid as the eyes of a deer, sought Jean's beseechingly.

"I am so sorry," she repeated. And passed, slowly—almost unwillingly, it seemed, out of the room, followed by Tormarin.

Jean raised her head from Blaise's shoulder and pushed back her hair, damp with perspiration, from her forehead. It seemed to her as though she had been down, down into some awful, limitless abyss of darkness from which she was now feebly struggling back to a painful consciousness of material things. A great sea had surged over her head, blotting out everything and remaining poised above her like a huge black arch, imprisoning her in the vast, deserted chaos in which she found herself wandering. Then—after a long time, it seemed—it had surged away again and she could distinguish Blaise's face bent above her.

"Then—then it's true!" she said stupidly. Her voice sounded thin, even to herself—a mere thread of sound. Blaise made no answer. He only held her a little closer in his arms. She supposed he hadn't heard that this little thread of voice. She must try again.

"Is it true, Blaise? Is Nests—? But somehow the last words wouldn't come."

She felt his arm jerk against her side.

"Yes," he said boldly. "It's true. Nests is alive. I've seen her."

Jean said nothing. She knew it had known all the time the arched wall of sea had kept her down in that awful black waste where there had been neither warmth nor sunshine but only bitter, freezing cold and lightless space. She clung a little closer to Blaise like a frightened, exhausted child.

"Heart's beloved . . . little dearest Jean . . ." She heard the wrung murmur of his voice above her head. Then suddenly, his arms tightening round her: "My soul!"

The sunlight still slanted in through the windows, mellow and golden. A gay shout of laughter came up from

She Shouldn't Be Tired
Nervous . . . circles under her eyes. If she would only try Lydia E. Pinkham's Vegetable Compound in tablet-form, she could be strong and happy again.

the boat on the lake. The clock on the chimneys struck the hour—twelve slow, maddening strokes.

Jean stared at its blank, foolish face. The hands had pointed to half-past eleven when the door of the room had closed behind Blaise and Madame de Varigny. It had taken just a brief half-hour to smash up her whole world—to rob her of everything that mattered.

"I must think—I must think," she muttered.

"Belovedest"—Blaise's voice was wonderfully tender—not with the passionate tenderness of a lover but with a solicitude that was almost maternal. "Belovedest, don't try to think now. Try to rest a little, won't you?"

And at that Jean came right back to an understanding of all that had happened, as the needle of a compass swings back to the frozen north.

Stony Plain and District

The local Moose Lodge has arranged for a dance to be held in their hall on the night Friday, Sept. 30th. Barth's orchestra.

At a service at the local United Church last Friday evening the Rev W. E. Siever was inducted into the pastorate.

The well-known farce "Beacon Dubbs" is billed for a return engagement at Stony Plain. Full particulars later.

Mrs Ph. Gebhardt of Los Angeles is visiting friends in Stony.

Jack McGillis left this week to take charge of the station at Entrance. On Monday his friends gave him a rousing farewell at the banquet room of the Royal Cafe.

The United Church Sunday School Rally Day Service will be held next Sunday evening, Sept. 25, at 7.30 p.m. All are welcome. Mrs C. A. Gates superintendent.

BUTTER AND EGGS WANTED AT THE ROYAL CAFE.

Missouri Lutheran Conference

The pastors of the local Lutheran churches of the Missouri Synod were present at the Conference for Northern Alberta, held in Edmonton last week, at which Rev H. Kuring read a paper one of St. Paul's Epistles. Others present included the Revs. E. Eberhardt, H. J. Boettcher, H. Freye, A. Radtzen and A. Behrendt. Mr W. Rosnau, of St. Matthew's school, read a paper on "Teaching."

On Sunday a mass meeting of Missouri Lutherans from all sections of the district was held at various times, the proceedings commencing with an English service at St. Peter's Lutheran church at 9.30 a.m., when Prot Baepfer spoke.

The second service took place at 10.45, at which Rev W. C. Eiert of Leduc spoke.

The speakers at the afternoon meeting were: Rev E. Eberhardt, Rev C. Thies, Mr W. Rosnau and Mr Magnus.

An inspirational service in the evening concluded the rally.

Mail should be posted before 10 p.m. for dispatch to both Trains No. 1 & No. 2 next morning.

Back from the North Country

Messrs Jac Brox of Spruce Grove; John Enders, Henry Enders, J. Metzler, and Pete Janzen returned on Saturday from a trip to Wemby, Grand Prairie and other points in the Peace River district. They met a number of the oldtime residents of Stony Plain town and district. Crups are good in the North country this season, but the low prices for the farmers' products, as well as the high transportation rates are proving a big handicap to the producers.

Visitors from the Eastern U. S. A.

On Friday Sept. 16 three distinguished Lutheran church men from New York visited the congregations of the Lutheran Manitoba Synod of this district. They were sent to northwestern Canada as a commission to investigate the standing of churches and missions of this synod in the interest of the United Lutheran church in America, of which general body the Manitoba Synod is a constituent member. This commission consisted of Rev Dr. E. Burgess, the chairman; Rev Dr. Gould Wickey and Rev E. A. Tappert. They were also interested in the various educational enterprises of the Lutheran bodies working in western Canada. The chief purpose of the tour of investigation, however, was to learn about the missionary work done and to be done within the Manitoba Synod.

On Sunday last, Dr. Gould Wickey, who is the executive secretary of the Board of Education in the United Lutheran church in America, preached at St. Matthew's church, Spruce Grove. In spite of the muddy roads and the pouring rain, the congregation was very well represented.

The special mission of Dr. Wickey with the commission is to study the educational institutions of the Lutheran church in western Canada.

Dr. Burgess supplied the pulpit at St. John's, at North Edmonton; and Dr. Tappert at Trinity, South Edmonton, at the Sunday morning services.

Editor Not Getting Hooked.

It is nearly time that Wetaanki Memorial Park had a gate. We cannot all be athletes; neither does the financial trend of the times permit us to take chances on getting hooked up to a barb wire fence.—Free Press.

Nature Studies.

A teacher was giving his class a lecture on clarity. "Willie," he said, "if I saw a boy beating a donkey, and stopped him from doing so, what virtue would I be showing?"

Willie (promptly)—"Brotherly love."

Owing to Pressure on Space

An Editor was dining out, and his hostess asked "Would you like some more pudding?"

"No, thank you," replied the Editor absent mindedly, "owing to tremendous pressure on space I am reluctantly compelled to decline."

Bus Time Table.

Stops at Royal Cafe.
To Edmonton, 9.40.
To Evansburg, 17.45.

Here and There

Maintaining his position among world nations as a producer of minerals, Canada led the world in the production of nickel and asbestos in 1931, came second in gold, platinum metals and cobalt, third in silver and fourth in refined zinc.

Mystery cruises, so popular out of New York, Southampton, Montreal, have come to the Pacific Coast, being ushered in there by the trim little liner "Princess Patricia," of the Canadian Pacific service, which took the first of these cruises recently. The ship had a full sailing list.

The Canadian Open Golf Championship, third of the ace contests figuring yearly in the Royal and Ancient game, will be staged on the course of the Royal York Hotel, Toronto, next year, word to that effect having been received by the secretary of the links from the Royal Canadian Golf Association.

Seventy-seven per cent. of wheat and 53 per cent. of oats and barley in the three western provinces were harvested by September 3, according to a report issued on that date from the general agricultural statistics of the Canadian Pacific Railway, Winnipeg. This result was reached in spite of the halt in harvesting operations due to heavy rains in wide sections of the Prairie Provinces.

All records for the story of the "big one that got away" were broken recently when a small, known fisherman hooked a beaver in Vermilion Lakes and played it for five minutes after which the tradition was fulfilled with loss of fly and leader. The hero of the exploit was S. C. Bennett of Toronto, a guest at the Banff Springs Hotel.

Canadians got a thrill recently when Captain J. A. Mollison, in-trepid trans-Atlantic solo flyer, spoke over the air, which he has conquered, from the Mayfair Lounge of the Canadian Pacific liner Empress of Britain. Captain Mollison was heard on 84 radio stations from Victoria to the Canadian Pacific department of Communications. Loud speakers distributed the broadcast to 60,000 visitors at the big exhibition at Toronto.

Though the "Princess Royal," veteran of the Canadian Pacific Railway B. C. Coast, steamship fleet has been arranged to leave now in the limbo of departed ships, her forebode bell remains on the air at Ocean Falls, B.C., where it has been installed at the Ocean Falls United Church mission, which ministers to the spiritual welfare of Japanese children.

Official and unofficial delegates to the Imperial Economic Conference went sightseeing from August 12th to the 14th. Two tours from Ottawa were arranged, both leaving the capital in special Canadian Pacific trains. Into Friday night, August 12, Shawinigan Falls and Three Rivers were visited by one party, while the other members were cruising down the St. Lawrence from Kingston to Montreal and spending Saturday evening in the metropolis. None of the United Kingdom, Canadian, Australian, New Zealand or Newfoundland or Irish government ministers were able to absent themselves from Conference deliberations, but their delegations were well-represented. Ministers enjoying the trip were Hon. N. C. Havens and Hon. A. P. J. Purdie, South Africa, and Hon. H. W. Moffett, Southern Rhodesia. The Canadian Government was represented by Hon. Arthur Gausse and Hon. Maurice Dwyer, with the Shawinigan party, and Hon. Alfred Durnan and Hon. R. A. Stewart, with the other party.
